PREFACE.

The Exhibition of British Deer Heads, held in London from June 26th to July 10th, was organised with the view of showing a really representative collection of British trophies. It may fairly claim to have been the most comprehensive one that has ever been attempted. The response to the appeal for heads was most generous, and though it was too much to hope that every first-class head killed should be exhibited, it is believed that there were not very many absent. The thanks of all who are interested in the subject are due to those ladies and gentlemen who so generously lent their trophies. The heads exhibited numbered two hundred and twenty-five. They were clearly divided into classes. The Scottish red deer heads (*Cervus elaphus*) were divided into four sections: (1) Those killed before 1875, (2) those killed after 1875, (3) island heads and (4) semi-feral. Island heads might be divided again into two sections, as those from North and South Harris and the Isle of Lewis and Skye cannot compare with the big park-like animals from Arran, Rhum and elsewhere. Following these came the English red deer: (1) Exmoor, Cumberland and (2) enclosed deer. New Zealand red deer were represented by six specimens, all killed in 1911 and 1912. A representative show of New Zealand heads would be impossible in the British Isles, as the majority of the finest heads are in New Zealand. These specimens, however, show the development which has taken place in deer whose progenitors were imported from the British Isles. Fallow deer (*Cervus dama*) are divided into three classes: (1) Scottish, (2) English (wild) and (3) English (park). The effect of environment and localisation is clearly seen. Roe deer (*Capreolus capreolus*) are also divided into three sections: (1) Scottish, (2) Irish and (3) English. Irish red deer are divided into: (1) Wild and (2) enclosed.

The measurements for which Messrs. Rowland Ward are responsible—and I take this opportunity of expressing my thanks for all the assistance they so kindly rendered—may be taken as revising existing records. No pains were spared to render them accurate. *Length of horn*: From the bottom edge of the burr or coronet to the highest tip point, following the outside curve of the horn. *Beam (circumference)*: Between bez (bay) and trez (tray), that is, between the second and third points; where the bay is absent, between brow and trez. *Inside span*: The greatest width between main beams taken in a straight line. Other measurements are given in some instances, and are of
British Deer Heads.

interest when taken in conjunction with the above standard measurements. Measurements take no account of the infinitesimal curves and gradations of a stag's horns. They are not everything, though all good heads would measure well. Beauty of form is a most important feature in estimating the quality of a trophy. This can best be seen in the photographs with which this record is illustrated, and which, taken in conjunction with the measurements, enables anyone to form his own opinion of any one trophy. Except in the case of the roe deer photographs are all taken to the same scale. The scale of the roe deer, however, is twice the size of the red deer.
INTRODUCTION.

SINCE the days of the Conquest the red deer has been an object of the chase. William the Red has stirred the imagination of more than one generation of schoolboys because “he loved the red deer as if he had been their father!” The severity of the old forest laws shows us the estimation in which these animals were held. In both Scotland and England the Kings, nobles and Church held special forest jurisdictions of the most oppressive kind. The Norman lawyers in England made out that all game belonged to the King, and the death of a man was of but little account compared with that of a deer. King John had eighteen forests, thirteen chases and seven hundred and eighty-one parks—quite a respectable allowance! A chase, it may be added, was an open forest not subject to special forest law, a park was an enclosed chase on the land of the owner, and a purlieu was an addition made to an old forest.

In “The Pleasant Ballad of King Henry II. and the Miller of Mansfield” we read:

All on a long summer’s day rode the king pleasantry,
With all his princes and nobles eche one;
Chasing the hart and hind, and the buck gallantye.

The Scottish nobles in the thirteenth century used occasionally to forget themselves in the ardour of the chase, and “in 1285 Robert de Brus, Lord of Annandale, and John de Seytone, his knight, were indicted before the justices itinerant on pleas of the Forest of Cumberland; the charge formulated against them being that, when hunting in Inglewood, they had taken a doe and a red deer ‘priket’ in excess of their allowance.” The Rev. H. A. Macpherson gives instances of pardons granted to the Scottish nobles by Edward III. in similar cases, and even in the days of Elizabeth they gave trouble. The Virgin Queen herself was not above taking a pot shot from a coign of vantage as the deer were driven past her. James I. and Prince Henry used frequently to visit Sir Henry Lee, K.G., the Ranger of Woodstock Park, and the quaint couplets attached to the heads in Lord Dillon’s possession show the success with which they met.

The condition of the deer forests in Scotland differed greatly at different times. First came the old forest laws, which were very stringent. At this time certain Royal forests existed for the sole delectation of the King and his nobles, while others consisted of land belonging to the great barons, who enjoyed a sole right of forestry. In course of time neighbouring proprietors gradually obtained charters or grants over their own estates. These increased, “and the few remaining rights of the great barons over the lands of their neighbours fell into desuetude and were no longer exercised.” The early ballads and romances of the sixteenth century, however, show that the heads of the great Scottish clans preserved their deer, and gave great attention to their pursuit.
Holinshed speaks of the "continual huntinge" of the ancient Highlanders. In "Collectanea de Rebus Albanicis" a letter is given under the Privy Seal of James VI. appointing Donald Farquharson in Braemar, Keeper of the King's Forests of Braemar, Cromar and Strath Dee (1584), giving him, among other powers, the right to "serche, seik, tak & apprehend" anyone repairing to these places "with bowis, culveringis, nettis or any uther instrument meli & convenient for the destruction of the deir & the mure fowlis." There is also given an interesting contract made between Colin Earl of Seaforth, Simon Lord Fraser of Lovat, Hector Munro of Clynes, John Chisholm of Comer, John Grant of Glenmoriston and John Bayne of Tulloch, and others of their respective names, for the preservation of the deer and roe on their several estates, and the punishment of trespassers (1628). They bound themselves and their tenants by solemn writ to protect their deer, doe and roe, "the stealing of which is appointed to be punished as theft, and the shooting of which is appointed to be punished with death and escheat of their goods moveable."

Many of the forests which are well known at the present day, such as Athole, Mar, Gaick, the Blackmount and others, were equally famous then. Athole is one of the oldest of the Scottish deer forests and its praises have been sung by Scrope in his "Art of Deerstalking." Dalness, or the Royal forest, is also very ancient, having been afforested in the reign of James IV. of Scotland. The usual method of killing deer in those days was by enormous drives, or tainchel as they were called, and we read of James V. passing out of Edinburgh with twelve thousand men and killing eighteen score harts. Next year he went to hunt in Athole, where "thirty score of hart & hynd" died the death. Later on Queen Mary of Scotland conducted her drives on an equally large scale in Athole, Mar, Badenoch and Moray, killing three hundred and sixty deer and other beasts.

John Taylor, the water poet as he styled himself, who was born at Gloucester in 1580, walked from London to Scotland in the year 1618. He was entertained by the Earl of Mar, and was present at a big hunt, which he described as follows: "The manner of the hunting is this—five or six hundred men do rise early in the morning, & they do disperse themselves divers ways, & seven, eight, or ten miles' compass, they do bring or chase in the deer in many herds (two, three, or four hundred in a herd) to such or such a place as the noblemen shall appoint them; then, when day is come, the lords & gentlemen of their companies do ride or go to the said places, sometimes wading up to the middle through burns & rivers, & then they being come to the place, do lie down on the ground, till those foresaid scouts, which are said the Tinchell, do bring down the deer; but as the proverb says of a bad cook, so these tinkell men do lick their own fingers: for besides their bows & arrows which they carry with them, we can hear now & then a harquebuss or musket go off, which they do seldom discharge in vain. Then after we had laid there three hours or thereabouts, we might perceive the deer appear on the hills round about us, (their heads making a shew like a wood,) which being followed close by the tinchell, are chased down into the valley where we lay; then all the valley on each side being waylaid with an hundred couple of greyhounds, they are all let loose as occasion serves upon the herd of deer, that with dogs, guns, arrows, dirks,
& daggers, in the space of two hours four score fat deer were slain, which after are disposed of some one way & some another, twenty & thirty miles, & more than enough left for us to make merry withall at our rendezvous.” These Scottish deerhounds were probably from the same source as the Irish wolfhound (the breed was in danger of extinction about the beginning of the nineteenth century, but it was successfully revived). They were originally kept for pulling down wounded deer and not as trackers. They have been entirely superseded at the present day by collies in those forests where dogs are used, though at Culachy the late Mr. Angelo used to course in the old style, and killed annually about thirty stags in this manner.

Modern deer-stalking is of comparatively recent date. Sir Walter Scott, with his descriptions of the beauties of the Highlands, gave it a stimulus, and the Prince Consort and Sir Edwin Landseer did much to popularise it. The lessening of the difficulties of locomotion enabled those who had previously been debarred from so doing to travel northwards, and gradually the demand for deer forests as we know them arose. In 1812 there were five; in 1872, seventy; in 1883, over a hundred; in 1888, one hundred and eleven; in 1907, one hundred and seventy; whilst in the latest estimate, that given by the late Mr. George Malcolm, the total is given as one hundred and ninety-eight.

A hundred years ago there were probably fewer deer in Scotland than at any previous time, then came a slump in sheep-farming, and the present rage for forests began. I quote from what I wrote ten years ago: "The reasons for this need not be here discussed; suffice it to say that much of the ground was afforested, and although for a time there was a lull, the demand redoubled about 1875. Then it was that proprietors of big estates in the North, who, rightly or wrongly, thought that their land was well suited for deer, afforested the ground. The deer, protected from all their enemies save man, increased and multiplied. The area of land set apart for their entire use was very great, but it could not maintain the increasing stock at the same standard as heretofore."

"The capability of any farm to maintain a permanent stock is limited to the shelter and food it can supply in early spring. The same rule applies to a forest." So wrote the late Lord Lovat, and that it was penned twenty years ago does not lessen its truth. At the time when much of the ground was afforested deer were its most valuable stock. Large areas which would have made good grouse moors were sacrificed because grouse were not wanted. Now signs are not wanting that this policy was a mistaken one. Sportsmen will not pay high rents to shoot inferior stags. Thirty years ago forty indifferent stags were worth more to the owner of a forest than twenty good ones. Provided he could get his thirty pounds per stag he saw no reason why he should not double his limit. He did so. The forest stood it for a year or two, and then, all the good stags having been killed, there were only indifferent beasts left from which to breed. The tenant perhaps gave it up. A succession of yearly tenants followed or it was let on short leases, and, as a forest, was ruined. It is the old, old cry. Quality was sacrificed for quantity, and now, save in those forests which have been in the hands of their proprietors year after year, or let on long leases, we see the result.
British Deer Heads.

A great deal of nonsense is talked about feeding deer. The stock is usually so large that, unless the deer do get some artificial food in the winter to help them through, they start on their period of horn growth in such bad condition that good heads are an impossibility. The late Lord Lovat considered feeding bad policy "unless absolutely necessary." There are very few forests in Scotland nowadays where it is not absolutely necessary. The area of land afforested has not increased proportionately with the increase in the numbers of the deer, hence the annual correspondence on the degeneracy of the Scottish stag. Another important point to bear in mind in this connection is that in forests subjected "to that fatal yearly tenancy" a stag has not time to grow a really good head. He is at his prime at twelve or thirteen. How many stags are allowed to reach that age in the majority of forests? Again, it is a much easier matter to shoot a stag now than in the days when Scrope sallied forth in Athole or Charles St. John pursued the muckle hart. A shot at two hundred yards is nothing out of the way in 1913, and but few stags whose death warrant has been signed escape. There are far too many hinds also, and it is open to discussion as to whether killing the yeld hinds every winter, as is done in most forests, must not have a prejudicial effect on the stock. I am not one of those who, speaking very generally, consider that Highland heads have deteriorated. Sixty, seventy, eighty and a hundred years ago a very small proportion of stags were killed compared to the annually increasing numbers of the present day. Heads were not valued then as they are now, and doubtless the majority have been suffered to sink into oblivion. In one respect, however, they were superior. Speaking, again generally, the most obvious comparison between the heads killed before 1875 and subsequent to that date which were shown at the exhibition was the lack of "style" of modern heads. So far as actual measurements go, there is very little to choose between the best heads of recent years and those killed during the middle of the nineteenth century. But in actual "style," thickness, roughness, shape, etc., the old heads were, on the whole, superior. In this sense heads have deteriorated.

There are many fine sports which it is possible to enjoy in these islands; deer-stalking holds its own with any of them. It takes place amid surroundings which, apart from all other considerations, place it on a plane by itself and on land which is absolutely and entirely useless for any purpose other than the support of game; it is surrounded by an atmosphere of romance which no other sport can rival, and calls into play many of those qualities which we admire most. Long may it continue!

Frank Wallace.

</table>
SCOTTISH RED DEER.
(Cervus elaphus.)

No. 1.

NO. 1.
LENT BY: His Majesty The King.
SHOT BY: His Majesty The King.
LOCALITY: Cauchanoer, Abergeldie, Balmoral.
DATE: September 15th, 1905.
NO. OF POINTS: 6 + 6.
LENGTH: 34 inches.
BEAM: 4$$\frac{3}{4}$$ inches.
INSIDE SPAN: 27$$\frac{1}{4}$$ inches.
WEIGHT: 14 stone.
No. 2.
Lent by: H.R.H. The Princess Royal.
Locality: Mar, Aberdeenshire.
Date: September 1st, 1900.
Number of Points: 6 + 6.
Length: 35\(\frac{3}{4}\) inches.
Beam: 5 inches.
Inside Span: 31\(\frac{1}{2}\) inches.
Weight: 19 stone 6 pounds (clean).
Remarks: A beautiful head, combining length, beam and symmetry with long, well-balanced points. The lower points are perfect.

No. 3.
Lent by: H.R.H. The Princess Royal.
Locality: Mar, Aberdeenshire.
Date: September 15th, 1900.
No. of Points: 6 + 7.
Length: 34 inches.
Beam: 4\(\frac{1}{2}\) inches.
Inside Span: 27 inches.
Weight: 18 stone 5 pounds (clean).
Scottish Red Deer.

KILLED BEFORE 1875.

No. 4.

Lent by: Mrs. Campbell of Dunstaffnage.
Shot by: The late Campbell of Monzie.
Locality: Glenartney, Perthshire.
Date: Circa 1843.
No. of Points: 8 + 8.
Length: Right, 40\(\frac{1}{4}\) inches; left, 38\(\frac{3}{4}\) inches.
Beam: 6\(\frac{3}{8}\) inches: 5\(\frac{7}{8}\) inches.

Remarks: Note by owner—"My father, Campbell of Monzie, was asked to show Prince Albert Highland deer-stalking, by the late Lady Willoughby d'Eresby." The horns are detached from the skull. Two illustrations of this head are shown.
No. 5.
LENT BY: Mrs. Campbell of Dunstaffnage.
SHOT BY: The late Campbell of Monzie.
LOCALITY: Glenartney, Perthshire.
DATE: Circa 1843.
NO. OF POINTS: 6 + 6.
LENGTH: $31\frac{1}{4}$ inches.
BEAM: $4\frac{3}{4}$ inches.
REMARKS: Same as before. A very massive head, of great beam and length. The horns are detached from the skull.

No. 6.
LENT BY: The Countess of Cromartie.
LOCALITY: Rhidorroch, Ross-shire.
DATE: Circa 1860.
NO. OF POINTS: 6 + 6.
LENGTH: $36\frac{1}{2}$ inches.
BEAM: $4\frac{3}{4}$ inches.
INSIDE SPAN: $31\frac{1}{4}$ inches.
No. 7.
Lent by: The Countess of Cromartie.
Locality: Rhidorroch, Ross-shire.
Date: Circa 1860.
No. of Points: 6 + 6.
Length: 35 inches.
Beam: 5\(\frac{1}{4}\) inches.
Inside Span: 28 inches.

No. 8.
Lent by: The Earl of Dalhousie.
Shot by: The Earl of Wemyss.
Locality: Invermark, Forfarshire.
Date: August 26th, 1864.
No. of Points: 5 + 4.
Length: 35 inches.
Beam: 4\(\frac{3}{4}\) inches.
Inside Span: 38\(\frac{1}{4}\) inches.
Weight: 16 stone.
Remarks: A head of unusual span.

No. 9.
Lent by: The Earl of Dalhousie.
Locality: Invermark, Forfarshire.
Date: August 27th, 1856.
No. of Points: 6 + 7.
Length: 35 inches.
Beam: 4\(\frac{3}{4}\) inches.
Inside Span: 22 inches.
Weight: 17 stone.
No. 10.
LENT BY: Sir John E. Fowler, Bart., of Braemore.
SHOT BY: Major Holmes.
LOCALITY: Braemore, Ross-shire.
DATE: 1868.
NO. OF POINTS: 6 + 6.
LENGTH: 34 inches.
BEAM: 4\frac{1}{2} inches.
INSIDE SPAN: 33\frac{1}{4} inches.
WEIGHT: 17 stone 12 pounds.
REMARKS: This head was used by Sir Edwin Landseer in several of his pictures.

No. 11.
LENT BY: The Hon. Mrs. Gordon Cumming.
SHOT BY: A poacher.
LOCALITY: Glenmoriston, Inverness-shire.
DATE: Circa 1864.
NO. OF POINTS: 6 + 6.
LENGTH: 36\frac{1}{4} inches.
BEAM: 4\frac{1}{2} inches.
INSIDE SPAN: 35 inches.
BROWS: 13 inches.
REMARKS: A head of great span.
No. 12.

Lent by: The Hon. Mrs. Gordon Cumming.

No. of Points: 7 + 7.

Length: 38\frac{1}{2} inches.

Beam: 5\frac{1}{2} inches.

Inside Span: 30\frac{3}{4} inches.

Remarks: A very beautiful head with all the qualities necessary for a first-class trophy. Long, thick, rough horn, with finely shaped wild points; it was considered by many the best head in the exhibition. Two illustrations of this head are shown.
No. 13.

Lent by: Sir Kenneth John Mackenzie, Bart., of Gairloch.

Shot by: The late G. Mackenzie, Esq.

Locality: Kinlochewe, Ross-shire.

Date: 1814.

No. of Points: 5 + 5.

Length: 38½ inches.

Beam: 5½ inches on each horn; above coronets 7¾ inches, 7½ inches.

Remarks: The horn is of very unusual quality. The span is not given as the skull has been damaged and attached to a block of wood.
Scottish Red Deer.

The following note, made by the late Lord Powerscourt, was sent by Mr. Radcliffe with the head:

The stag that bore this head was killed in Lord Lovat's forest of Glenstrathfarrar, Inverness-shire, by the late Roualeyn Gordon-Cumming, the celebrated African hunter. I was acquainted with him and also with his brother, the late Sir Alexander Penrose-Gordon-Cumming, and I often had conversations with them both about Roualeyn's adventures in Africa and in Scotland. I saw this head in his collection at that time, about 1858-59, when he used to exhibit his African and other sporting trophies by the Caledonian Canal at Fort Augustus.

He was very poor, and used to support himself by this exhibition, where he used to attend in his Highland dress, and a magnificent figure he was, some six feet four in height and a very powerful man, and he used to relate his sporting adventures and explain his collections at a charge of one or two shillings, or thereabouts. The steamers plying on the Caledonian Canal between Inverness and Banavie had to stop at Fort Augustus for an hour or more, passing through the locks, and the passengers used to land and visit his exhibition. Passing down the Canal on my way from the Highlands in 1859, I landed with others and was talking to him, and I remarked this fine head, which is forty-one inches wide and has eleven points. He said, "If everyone had their rights, that head belongs to Lord Lovat, for I shot the stag in his forest." Gordon-Cumming was known in Scotland as a great poacher, and was often after deer where he had no business to be, but few dared to interfere with him. He said that he wanted the head, as it was the widest he had ever seen in Scotland. In those days deer forests were not so strictly preserved as they are now, and on the hills, which were grazed by sheep, stags were shot without any interference by anyone; that was about the year 1845 or 1846. Through the kindness of Mr. St. George Littledale, I got the following story of how Gordon-Cumming killed his stag. He had it from a stalker named Colin Campbell, who had it, I believe, from his father. I give it in his own words:

"The stag was spotted by the stalker in charge of the beat where the stag had his home, and, as is very often the case when you are keen on a good head, that is often when you do not get him. However, the stalker, after a day or two of unsuccess, was told to keep his ears and eyes open, in case Gordon-Cumming, who was in the neighbourhood, might get hold of the head. Some gentleman near by died, and the sportsman went to the funeral, giving instructions to his stalker not to go unless he saw that Gordon-Cumming went; if so, he might go. Gordon-Cumming put on his Highland dress and walked along the road, when he met the stalker, who asked him what he was going to do with a rose he happened to have in his button-hole at a funeral? Gordon-Cumming replied that when everything was over he would leave him the rose. The stalker got it, shifted his clothes, and proceeded to the funeral. When Gordon-Cumming got round the corner he took a circuit route and made for the stag, and in three hours had the head off the stag. The stalker, having heard the shot, made for the direction of the sound, where he found the carcass with the rose by its side!—(Signed) COLIN CAMPBELL"

Roualeyn Gordon-Cumming died in 1866, and I bought the stag's head at the sale of his collection in London after his death.

Powerscourt.

December 16th, 1899.
No. 15.

Lent by: The Duke of Richmond and Gordon.

Shot by: Alexander, fourth Duke of Gordon, in his eighty-fourth year.

Locality: Gordon Castle, Banffshire.

Date: October 5th, 1826.

No. of Points: $8 + 9$.

Length: $33\frac{1}{2}$ inches.

Beam: $4\frac{1}{4}$ inches.

Inside Span: $24\frac{1}{4}$ inches.

Outside Spread: $35\frac{1}{4}$ inches.

Remarks: This head, though inferior in measurements to No. 16, is of better shape, and is one of the finest Scottish heads on record.

No. 16.

Lent by: The Duke of Richmond and Gordon.

Shot by: Robert Cumming, Forester.

Locality: Glenfiddich, Banffshire.

Date: September 24th, 1831.

No. of Points: $9 + 8$.

Length: $38\frac{1}{2}$ inches.

Beam: $6\frac{1}{4}$ inches.

Inside Span: $19\frac{1}{2}$ inches.

Outside Spread: $30\frac{1}{4}$ inches.

Remarks: This head and No. 15, killed near Gordon Castle, are two of the finest Scottish heads on record.
Scottish Red Deer.

No. 17.
Lent by: Sir Charles H. A. F. L. Ross, Bart.

On the skull is written: “Killed by a poacher.”

Locality: Deanich, Ross-shire.

Date: Circa 1840.

No. of Points: 7 + 10.

Length: 31 inches.

Beam: 4½ inches.

Inside Span: 29½ inches.

Outside Spread: 40 inches.

Remarks: This head was given to Lord Castlereagh in 1844 by J. Hay Mackenzie of Cromartie. Sir Charles Ross writes: “One of the crofters wounded the stag at the back of Deanich Lodge and it ran down and bayed in the pool by the lodge; then the crofter, the Deanich keeper and his boys all finished it off together.” The head was in Lord Powerscourt’s collection at one time, and has often been described as the “Rhiddoroch” head. The abnormal brows measure: Right, 17 inches; left, 17½ inches.

No. 18.
Lent by: Mrs. Edward Ross.

Shot by: The late Edward Ross.

Locality: Dibiedale, Ross-shire.

Date: 1857.

No. of Points: 6 + 6.

Length: 32½ inches.

Beam: 5 inches.

Inside Span: 31½ inches.

Remarks: This stag was sought for eight seasons and was called the Big Stag of Corrie Valigan. Known to be over twenty years old, he was killed by Edward Ross when the latter was sixteen years of age.
No. 19.

LENT BY: Mrs. Edward Ross.

Scottish Red Deer.

No. 118.
Lent by: Captain Noel Money, D.S.O.
Shot by: Owner.
Locality: Glenborrodale, Ardnamurchan, Argyllshire.
Date: August 27th, 1912.
No. of Points: 6 + 6.
Length: 34\frac{3}{8} inches.
Beam: 4\frac{3}{8} inches.
Inside Span: 32\frac{1}{4} inches.

No. 119.
Lent by: Sir Sigismund Neumann, Bart.
Shot by: L. Neumann, Esq.
Locality: Invercauld, Aberdeenshire.
Date: September 3rd, 1902.
No. of Points: 6 + 6.
Length: 35\frac{1}{4} inches.
Beam: 4\frac{1}{8} inches.
Inside Span: 29\frac{1}{8} inches.
Weight: 17 stone 10 pounds.
Remarks: There is a small excrescence on the left top which might be counted as a point.

No. 120.
Lent by: Sir Sigismund Neumann, Bart.
Shot by: Owner.
Locality: Invercauld, Aberdeenshire.
Date: September, 1899.
No. of Points: 6 + 7.
Length: 37 inches.
Beam: 4\frac{3}{8} inches.
Inside Span: 24 inches.
Weight: 13 stone 8 pounds.

No. 121.
Lent by: Mrs. Henry Tate.
Shot by: The late Henry Tate, Esq.
Locality: Caenlochan, Forfarshire.
Date: September 24th, 1897.
No. of Points: 6 + 5.
Length: 33 inches.
Beam: 5 inches.
Inside Span: 25\frac{1}{2} inches.
Weight: 19 stone.
ISLAND HEADS.

No. 122.

Lent by: W. P. Brigstocke, Esq.

Shot by: Owner.

Locality: Newton, Loch Maddy, North Uist.

Length: 36 inches.

Beam: 4 4/4 inches.

Inside Span: 31 inches.

Weight: 22 stone.
Scottish Red Deer.

No. 123.
LENT BY: Sir George Bullough.
SHOT BY: Owner.
LOCALITY: Isle of Rhum, Argyllshire.
DATE: September 12th, 1912
NO. OF POINTS: 7 + 8.
LENGTH: 33\frac{1}{2} inches.
BEAM: 5\frac{1}{4} inches.
INSIDE SPAN: 22\frac{1}{2} inches.

Remarks: A good head of the "cromie" type.

No. 124.
LENT BY: Cambridge University Museum of Zoology.
SHOT BY: The late Henry Evans, Esq.
LOCALITY: Jura, Argyllshire.
NO. OF POINTS: 5 + 5.
LENGTH: 28\frac{1}{2} inches.
BEAM: 5 inches.
INSIDE SPAN: 27\frac{1}{2} inches.

Remarks: A good head of the "cromie" type.
No. 125.

Lent by: Allan Gordon Cameron, Esq.

Locality: Jura, Argyllshire.

Date: September, 1878.

No. of Points: 3 + 3.

Length: 11 inches.

Beam: 4 inches.

Inside Span: 9 inches.

Weight: 13 stone 2 pounds.

Remarks: These peculiar "cromie" (crooked) heads are confined to the Island of Jura. During his long tenancy the late Henry Evans shot only about a dozen of them. A few have been killed during recent years.

No. 126.

Lent by: Allan Gordon Cameron, Esq.

Shed horns picked up.

Locality: Jura, Argyllshire.

Date: Circa 1880.

No. of Points: 6 + 5.

Length: 29 inches.

Beam: 6½ inches.

Remarks: These horns are those drawn by Archibald Thorburn in his picture of a Jura cromie in Grimble's "Deer Forests of Scotland," and are unusually good for this peculiar class of abnormality. They are supposed to be the best "cromie" horns in existence.
Scottish Red Deer.

No. 127.
Lent by: Lord George Campbell.
Shot by: Owner.
Locality: Jura, Argyllshire.
Date: 1901.
No. of Points: 5 + 5.
Length: 34 inches.
Beam: 4\(\frac{3}{4}\) inches.
Inside Span: 36 inches.
Weight: 22 stone.
Remarks: A head of wide span.

No. 128.
Lent by: Colin Campbell, Esq., of Jura.
Locality: Jura, Argyllshire.
No. of Points: 6 + 3.
Length: 22 inches.
Beam: 5 inches.
Inside Span: 10 inches.
Remarks: Abnormal. Skull and horns of "cromie."

No. 129.
Lent by: Colin Campbell, Esq., of Jura.
Locality: Jura, Argyllshire.
Date: 1907.
No. of Points: 6 + 6.
Length: 33\(\frac{1}{4}\) inches.
Beam: 5 inches.
Inside Span: 24\(\frac{3}{4}\) inches.
Weight: 19 stone 3 pounds.
No. 130.
Lent by: John Talbot Clifton, Esq.
Shot by: Owner.
Locality: Newton, Loch Maddy, North Uist.
Date: September 30th, 1912.
No. of Points: 7 + 8.
Length: 30 inches.
Beam: 4 inches.
Inside Span: 25 inches.
Weight: 21 stone 6 pounds.
Remarks: Vide No. 143.

No. 131.
Lent by: C. H. Dendy, Esq.
Shot by: M. H. Dendy, Esq.
Locality: Sponish, North Uist, Inverness-shire.
Date: October 4th, 1909.
No. of Points: 6 + 6.
Length: 35\frac{3}{4} inches.
Beam: 4\frac{3}{4} inches.
Inside Span: 26 inches.
No. 132.

**Lent by**: The Earl of Eglinton and Winton.

**Shot by**: Owner.

**Locality**: Benmore, Isle of Mull, Argyllshire.

**Date**: October 22nd, 1909.

**No. of Points**: 5 + 6.

**Length**: 36\(\frac{1}{2}\) inches.

**Beam**: 5\(\frac{3}{4}\) inches.

**Inside Span**: 30\(\frac{1}{4}\) inches.

**Weight**: 20 stone.

**Remarks**: Brows 12 inches. *The tray on the left horn is forked.*

---

No. 133.

**Lent by**: The Marquess of Graham.

**Shot by**: The Marchioness of Graham.

**Locality**: Brodick, Isle of Arran, Buteshire.

**Date**: October 11th, 1905.

**No. of Points**: 5 + 5.

**Length**: 34 inches.

**Beam**: 5\(\frac{1}{2}\) inches.

**Inside Span**: 35\(\frac{1}{4}\) inches.

**Weight**: 21 stone.
No. 134.
Lent by: The Marquess of Graham.
Shot by: Owner.
Locality: Brodick, Isle of Arran, Buteshire.
Date: September 13th, 1907.
No. of Points: 5 + 5.
Length: 35½ inches.
Beam: 5 inches.
Inside Span: 27 inches.
Weight: 26 stone 4 pounds.
Remarks: The bays are missing.

No. 135.
Lent by: The Marquess of Graham.
Shot by: Owner.
Locality: Brodick, Isle of Arran, Buteshire.
Date: September 13th, 1907.
No. of Points: 6 + 6.
Length: 37 inches.
Beam: 4½ inches.
Inside Span: 23 inches.
Weight: 27 stone.
No. 136.
Lent by: The Marquess of Graham.
Shot by: Colonel Knox.
Locality: Brodick, Isle of Arran, Buteshire.
Date: August 21st, 1878.
No. of Points: 6 + 6.
Length: 37\(\frac{1}{4}\) inches.
Beam: 4\(\frac{1}{2}\) inches.
Inside Span: 32\(\frac{1}{4}\) inches.
Remarks: Fine lower points. A head of great beauty, though rather thin. The horns resembled those of a mainland stag killed in the early part of the last century.

No. 137.
Lent by: W. H. Lindsay, Esq.
Shot by: Owner.
Locality: Sconser, Isle of Skye.
Date: October 12th, 1907.
No. of Points: 5 + 6.
Length: 34\(\frac{1}{4}\) inches.
Beam: 4\(\frac{1}{4}\) inches.
Inside Span: 33 inches.
No. 138.
Lent by: Mrs. Joe A. Platt.
Shot by: Owner.
Date: 1912.
No. of Points: 6 + 6.
Length: 25½ inches.
Beam: 3⅞ inches.
Inside Span: 20 inches.
Remarks: The best head killed during the present tenant's occupancy. Very symmetrical, with perfect "cups."

No. 139.
Lent by: Sir Samuel Edward Scott, Bart.
Shot by: Owner.
Locality: Amhuinnsuidh, North Harris, Inverness-shire.
No. of Points: 6 + 7.
Length: 27½ inches.
Beam: 3⅞ inches.
Inside Span: 20½ inches.

No. 140.
Lent by: Sir Samuel Edward Scott, Bart.
Shot by: Owner.
Locality: Amhuinnsuidh, North Harris, Inverness-shire.
No. of Points: 6 + 6.
Length: 26 inches.
Beam: 3½ inches.
Inside Span: 22½ inches.
No. 141.

Lent by: Cambridge University Museum of Zoology.

Shot by: Late Henry Evans.

Locality: Jura, Argyllshire.

Date: September 16th, 1884.

No. of Points: 7 + 7.

Length: 27½ inches.

Beam: 4½ inches.

Inside Span: 23½ inches.

Weight: 17 stone 8 pounds.

No. 142.

Lent by: Cambridge University Museum of Zoology.

Shot by: Late Henry Evans.

Locality: Jura, Argyllshire.

No. of Points: 2 + 3.

Length: 26 inches.

Beam: 3½ inches.

Remarks: Abnormal head of the "cromie" type.

No. 143.

Lent by: John Talbot Clifton, Esq.

Shot by: Owner.

Locality: Newton, Loch Maddy, North Uist.

Date: September 30th, 1912.

No. of Points: 6 + 6.

Length: 27½ inches.

Beam: 4 inches.

Inside Span: 27½ inches.

Weight: 20 stone 11 pounds.

Remarks: This stag, with No. 130, constitutes a record for weights killed right and left in Scotland.
SEMI-FERAL.

"Semi-feral" includes park deer running wild and wild deer in a park or enclosure. Mr. Pilkington’s fifteen-pointer is of unusual interest, as it shows to what size a wild-born Scottish head will grow under favourable conditions. The whole history of this animal appeared in Country Life, December 14th, 1912. In 1907 an eleven-pointer with a promising head was noticed at Sandside. Next year he was a royal, and in 1909 was enticed into an enclosure of about four hundred acres, where the remnants of a fir plantation afford some shelter. Here he was kept with hinds until 1912, when, showing signs of going back, he was turned out on the hill, and in September was killed. His food was exactly the same as that of the other deer at Sandside, which are fed in winter.

No. 144.
Lent by: Thomas Pilkington, Esq.
Shot by: Owner.
Locality: Sandside, Caithness-shire.
Date: 1912.
No. of Points: 8 + 7.
Length: 40 inches.
Beam: 5 inches.
Inside Span: 34\(\frac{1}{2}\) inches.
Weight: 23 stone 8 pounds.
Remarks: A most interesting head, showing what care and good feeding will do for a wild stag’s antlers.

No. 145.
Lent by: Charles James Lucas, Esq.
Shot by: Owner.
Locality: Wyvis, Ross-shire, and Warnham Court, Sussex.
Date: Killed 1897.
No. of Points: 6 + 7.
Length: 37\(\frac{1}{2}\) inches.
Beam: 5 inches.
Inside Span: 29\(\frac{1}{2}\) inches.
Outside Spread: 42\(\frac{1}{2}\) inches.
Remarks: Came as a calf from Wyvis, and lived in the park at Warnham Court all his life. He had to be killed as he suddenly turned savage.
ENGLISH RED DEER.

The English red deer are all, with one exception, from Exmoor and the Quantocks. Heads obtained many years ago do not show superiority to those killed during recent years, and, as in other parts, were not regarded as of great value. They were nailed up over stables and outhouses, the lower points in some instances having been sawn off to facilitate free ingress and egress. Though no such head was exhibited, Sir C. Thomas Dyke Acland lent a sixteen-pointer killed so far back as 1792.
No. 146.
LENT BY: The Earl Fortescue.
KILLED BY: Devon and Somerset Staghounds.
LOCALITY: Exmoor.
DATE: September 9th, 1815.
NO. OF POINTS: 6 + 6.
LENGTH: 33 inches.
BEAM: 5 inches.
INSIDE SPAN: 24 inches.
REMARKS: Found in Blagdon Wood, and killed at Porlock Weir.

No. 147.
LENT BY: The Earl Fortescue.
KILLED BY: Devon and Somerset Staghounds.
LOCALITY: Exmoor.
DATE: October 7th, 1912.
NO. OF POINTS: 6 + 6.
LENGTH: 36 inches.
BEAM: 4½ inches.
INSIDE SPAN: 36½ inches.
REMARKS: Found at Raleigh's Cross, and killed at Bincombe Howey. October 7th, 1912.
No. 148.

**Lent by:** The Earl Fortescue.
**Killed by:** Devon and Somerset Staghounds.
**Locality:** Exmoor.
**Date:** September 7th, 1881.
**No. of Points:** 6 + 6.
**Length:** 34 \( \frac{3}{8} \) inches.
**Beam:** 5 \( \frac{3}{8} \) inches.
**Inside Span:** 31 \( \frac{1}{8} \) inches.
**Remarks:** Found in Gratton Wood, and killed under Buscombe.

No. 149.

**Lent by:** The Right Hon. James W. Lowther, Speaker of the House of Commons.
**Shot by:** Owner.
**Locality:** Glencoin, Cumberland.
**Date:** September 22nd, 1899.
**No. of Points:** 5 + 6.
**Length:** 20 inches.
**Beam:** 5\( \frac{1}{4} \) inches.
**Inside Span:** 23\( \frac{1}{4} \) inches.
**Weight:** 28 stone 5 pounds.
No. 150.
Lent by: Charles N. Nelder, Esq.
Killed by: Devon and Somerset Staghounds.
Locality: Exmoor.
Date: September 5th, 1803.
No. of Points: 7 + 7.
Length: 38\(\text{\frac{1}{2}}\) inches.
Beam: 5 inches.
Inside Span: 30\(\text{\frac{1}{2}}\) inches.
Remarks: An account of the death of this stag is given in "The Chase of the Wild Red Deer," by Charles Palk Collyns, Appendix I., page 233. September 5th, 1803. The head, when purchased after the death of Mr. J. Worth, grandson of the John Worth who was Master in 1803, was fixed to a wooden model of a deer's head, and still had on the horns the remains of gold leaf.

No. 151.
Lent by: R. A. Sanders, Esq.
Killed by: Devon and Somerset Staghounds.
Locality: Exmoor.
Date: September 6th, 1902.
No. of Points: 9 + 7.
Length: 36 inches.
Beam: 4\(\frac{1}{2}\) inches.
Inside Span: 24\(\frac{1}{2}\) inches.
Remarks: Found in Longwood, and killed at Horner Mill.
No. 152.
Lent by: R. A. Sanders, Esq.
Killed by: Devon and Somerset Staghounds.
Locality: Exmoor.
Date: September 26th, 1904.
No. of Points: 8 + 7.
Length: 35½ inches.
Beam: 5½ inches.
Inside Span: 24 inches.
Remarks: Found in allotment, and killed at Three Waters.

No. 153.
Lent by: R. A. Sanders, Esq.
Killed by: Devon and Somerset Staghounds.
Locality: Exmoor.
Date: October 13th, 1905.
No. of Points: 7 + 7.
Length: 35 inches.
Beam: 5½ inches.
Inside Span: 29½ inches.
Remarks: Found on Codsend Moor, and killed at Luxborough.
No. 154.
Lent by: Lord St. Audries.
Killed by: Devon and Somerset Staghounds.
Locality: Quantock Hills, Somerset.
Date: October 25th, 1893.
No. of Points: 6 + 7.
Length: 36½ inches.
Beam: 6 inches.
Inside Span: 28½ inches.
Remarks: There is an excrescence on the left top which might be counted as a point. A head of great beam and thickness.

No. 155.
Lent by: Sir Charles T. Dyke Acland, Bart.
Killed by: Devon and Somerset Staghounds.
Locality: Exmoor.
Date: 1792.
No. of Points: 7 + 9.
Length: 33 inches.
Beam: 5½ inches.
Inside Span: 29½ inches.
Remarks: Found in Deane Cleaves, and killed at Rawleigh Mills.
ENGLISH RED DEER.

(ENCLOSED.)

The park deer heads showed great variation. The Warnham Court exhibit is in many respects the most remarkable. No other park shows such exuberance of horn growth. Mr. Millais' head from Langley is perhaps the most beautiful, approximating as it does to the normal type. The white head lent by the Duke of Bedford is also very fine, and Lord Brownlow's two heads are of great interest. Lord Dillon's Jacobean heads are two of the oldest authenticated heads on record.
No. 156.
LENT BY: The Duke of Bedford.
LOCALITY: Woburn, Bedfordshire.
DATE: September 13th, 1871.
NO. OF POINTS: 10 + 15.
LENGTH: 33 inches.
BEAM: 8½ inches.
INSIDE SPAN: 12 inches.
REMARKS: Pale variety. Abnormal growth.

No. 157.
LENT BY: The Duke of Bedford.
LOCALITY: Woburn, Bedfordshire.
DATE: Circa 1909.
NO. OF POINTS: 12 + 9.
LENGTH: 44 inches.
BEAM: 5½ inches.
INSIDE SPAN: 33½ inches.
REMARKS: Pale variety.
No. 158.

Lent by: Earl Brownlow.
Locality: Ashridge Park, Berkshire.
No. of Points: 8 + 11.
Length: 29\frac{1}{2} inches.
Beam: 6\frac{1}{4} inches.
Inside Span: 17\frac{1}{2} inches.
Remarks: This stag was known to be thirty-two years old.

No. 159.

Lent by: Earl Brownlow.
Locality: Ashridge Park, Berkshire.
No. of Points: 11 + 10.
Length: 42\frac{1}{2} inches.
Beam: 5\frac{3}{8} inches.
Inside Span: 27 inches.
Remarks: A park head taken in in November, and fed on everything calculated to make bone during the period of horn growth. When taken in he had fifteen points.
The following inscription was attached to this head:

From Foxhole coppice round, Great Britain's King I fled;
But what? in Kiddington Pond he overtook me dead.

No. 161.
Lent by: Viscount Dillon.
Killed by: King James I.
Locality: Ditchley Park, Oxfordshire.
Date: Wednesday, August 22nd, 1610.
Number of Points: 6 + 7.
Length: 37½ inches.
Beam: 5½ inches.
Inside Span: 33½ inches.
Remarks: Ditto as for No. 160.

The following inscription was attached to this head:

In Henly Knap to hunt me King James's Prince Henry found me,
Cornebury Parke River, to end their hunting, drownd me.
So much interest was aroused by Lord Dillon's Jacobean heads that, through his kindness we give the inscriptions attached to the other four heads in his possession of about the same date.

King James made me to run for life, from Deadmans riding.
I ran to Soreil Gate, where death for me was biding.

1608. August 27. Tuesday.
The King pursude me fast from Grange coppice flying
The King did hunt me living, the queens parke had me dying.

The King and prince from Grange made me to make my race
But death neere the queenes parke gave me a resting place.

From Foxhole driven, what could I doe, being lame? I fell
Before the king and prince, neere Rosamond her well.
No. 162.

Lent by: Charles James Lucas, Esq.

Locality: Warnham Court, Sussex.

Date: Born, 1880; killed, 1894.

Number of Points: 20 + 19.

Length: 37 inches.

Beam: 6½ inches.

Inside Span: 24 inches.

Remarks: Known as "The Great Warnham Head," the largest park head ever grown in England. The details of the Warnham Park heads, as given in the Vienna Catalogue, are not, in every instance, correct. The measurements of the shed antlers for the previous six years are as follows:

No. 169.
Lent by: Charles James Lucas, Esq.
Locality: Warnham Court, Sussex.
Date: 1904 A.
Number of Points: 11 + 13.
Length: 37 inches.
Beam: 6 inches.
Inside Span: 33½ inches.
Tip to Tip: 26 inches.
Remarks: The most symmetrical first-class head ever grown in the park.

No. 170.
Lent by: Charles James Lucas, Esq.
Locality: Warnham Court, Sussex.
Date: 1904 B.
No. of Points: 11 + 15.
Length: 34½ inches.
Beam: 7 inches.
Inside Span: 29½ inches.
Outside Spread: 52½ inches.
Tip to Tip: 23 inches.
Remarks: This is the widest known head across the antlers.
No. 171.
Lent by: John Guille Millais, Esq.
Locality: Langley Park.
No. of Points: 6 + 7.
Length: 41½ inches.
Beam: 5 inches.
Inside Span: 32 inches.
Remarks: Pale variety. This is an unusually fine example of the head of a park stag of the normal type.

No. 172.
Lent by: Viscount Powerscourt.
Locality: Vaynol, North Wales.
No. of Points: 13 + 10.
Length: Right, 38½ inches; left, 40 inches.
Beam: Right, 5½ inches; left, 5½ inches.
Remarks: Shed horns mounted. This stag was eighteen years old. Horns weighed 14 pounds 2 ounces. These antlers and those of No. 175 are evidently the shed horns of the same animal.
No. 173.
Lent by: The Earl of Gainsborough.
Locality: Exton Park, Rutland.
Date: September 2nd, 1905.
No. of Points: 7 + 7.
Length: 29 inches.
Beam: 4½ inches.
Inside span: 26½ inches.
Remarks: Crossed with Warnham Court and Lowther Castle herds. Weight, 15 stone 5 pounds (215 pounds).

No. 174.
Lent by: Charles James Lucas, Esq.
Shed Horns.
Locality: Warnham Court, Sussex.
Date: January 30th, 1913.
No. of Points: 11 + 11.
Length: 45 inches.
Beam: 7½ inches.
Remarks: This is the longest recorded horn of a park stag.

No. 175.
Lent by: Joseph Whitaker, Esq.
Locality: Vaynol, North Wales.
Date: 1900.
No. of Points: 10 + 8.
Length: 40½ inches.
Beam: 5¼ inches.
Remarks: Horns mounted on wooden boss.
NEW ZEALAND RED DEER.

There are several different herds of red deer in New Zealand. Those represented are, with one exception killed in the Rakaia, South Canterbury, from North Otago. This herd is descended from two stags and five hinds which were presented to the Otago Acclimatisation Society by the Earl of Dalhousie in 1870. Their descendants are the only deer in New Zealand claiming pure Scottish descent. It is interesting to compare their heads with those from Invermark (Nos. 8 and 9). The Rakaia herd, descended from Stoke deer, was only established in 1897. None was killed until 1907. New Zealand measurements make Mr. Williams’ head rather longer than those given.
No. 176.
Lent by: G. N. Horlick, Esq.
Shot by: Owner.
Locality: North Otago, South Island, New Zealand.
Date: 1912.
No. of Points: 6 + 6.
Length: 42½ inches.
Beam: 5 inches.
Inside Span: 29½ inches.

No. 177.
Lent by: Charles E. Lucas, Esq.
Shot by: Owner.
Locality: North Otago, South Island, New Zealand.
Date: April 17th, 1912.
No. of Points: 7 + 7.
Length: 43¼ inches.
Beam: 5½ inches.
Inside Span: 30 inches.
Outside Spread: 37 inches.
No. 178.

Lent by: Charles E. Lucas, Esq.
Shot by: Owner.
Locality: North Otago, South Island, New Zealand.
Date: April 10th, 1912.
No. of Points: 7 + 7.
Length: 43 inches.
Beam: 5½ inches.
Inside Span: 32½ inches.

No. 179.

Shot by: C. Williams.
Locality: North Otago, South Island, New Zealand.
Date: 1911.
No. of Points: 6 + 6.
Length: 40 inches.
Beam: 5½ inches.
Inside Span: 30 inches.
Remarks: No bays.
No. 180.
SHOT BY: C. Williams.
LOCALITY: North Otago, South Island, New Zealand.
DATE: 1911.
NO. OF POINTS: 7 + 7.
LENGTH: 40 inches.
BEAM: 5½ inches.
INSIDE SPAN: 26½ inches.

No. 181.
LENT BY: C. Williams, Esq.
SHOT BY: Owner.
LOCALITY: Rakaia, Canterbury, New Zealand.
DATE: 1911.
NO. OF POINTS: 5 + 6.
LENGTH: Right, 48 inches; left, 47½ inches.
BEAM: 6½ inches.
INSIDE SPAN: 32½ inches.
OUTSIDE SPREAD: 40½ inches.
The fallow deer heads (Cervus dama), numbering eight, are remarkable for their divergence in type. The New Forest and Epping Forest herds are of great antiquity, but are very dissimilar. Those from the former locality show a tendency to bifurcate in the palm; while the Epping deer, which are black and unspotted, grow very thin, attenuated palms. This is probably due to isolation and gradual deterioration. The Petworth heads are very fine, the roughness, symmetry and well-defined points of No. 184 combining all the qualifications to render it first class. Mr. Harting's head from Uppark is also a good head of great length.

ROE DEER.

(CAPREOLUS CAPREOLUS)

SCOTTISH, IRISH AND ENGLISH.

The roe deer (Capreolus caprea) seldom has justice done to him. Stalked with a rifle, he is capable of providing first-class sport, while a really good roe head is a much greater rarity than a good stag’s head. Length, symmetry, roughness, with well-developed points, go to the making of a first-class trophy. The Lissadell head is the most remarkable, and no such massive head has ever been secured in the British Isles of which any trace is found.
SCOTTISH.

No. 190.
LENT BY: Charles Maitland Pelham Burn, Esq.

Lent by: J. Hamilton Leigh, Esq.
Shot by: Owner.
Locality: Matchams, Hampshire.
Date: 1905.
No. of Points: 3 + 3.
Length: 9½ inches.
Beam: 3½ inches.
Tip to Tip: 4 inches.
IRISH RED DEER.

The Irish red deer form a group apart. The typical fully developed Irish head is usually more massive than a Scottish head. The tendency of most adult Irish heads seems to be to run to fourteen points, rarely making the cup, but the cup dividing into two branches, on each of which are two strong points. They reach very heavy weights. Irish heads are divided into two classes, as those killed at Glenveagh are enclosed deer. The extent of this forest extends, however, to over twenty-two thousand acres, and the deer are just as difficult to stalk as those living under no such restrictions.
UNENCLOSED DEER.

No. 214.
Lent by: The Hon. Mrs. Bourke.
Shot by: Lord Mayo.
Locality: Muckross.
No. of Points: 7 + 7.
Length: 31\frac{1}{4} inches.
Beam: 4\frac{1}{2} inches.
Inside Span: 21\frac{3}{4} inches.

No. 215.
Lent by: Greville Douglas, Esq.
Shot by: Owner.
Locality: Killarney.
Date: September, 1886.
No. of Points: 5 + 6.
Length: 32\frac{1}{4} inches.
Beam: 4\frac{1}{2} inches.
Inside Span: 32\frac{1}{4} inches.

No. 216.
Lent by: The Earl of Kenmare.
Shot by: Owner.
Locality: Glena.
Date: September 5th, 1908.
Number of Points: 7 + 7.
Length: 30 inches.
Beam: 5 inches.
Inside Span: 22 inches.
Weight: 28 stone 7 pounds.
Remarks: The heads from this locality exhibit a difference in type to those from Derricunnihy.
No. 217.
Lent by: The Earl of Kenmare.
Shot by: Owner.
Locality: Derricunnihy.
Date: October 2nd, 1889.
No. of Points: 7 + 7.
Length: 30 inches.
Beam: 4½ inches.
Inside Span: 24½ inches.
Weight: 23 stone 7 pounds.

No. 218.
Lent by: The Earl of Kenmare.
Shot by: Owner.
Locality: Derricunnihy.
Date: October 4th, 1902.
No. of Points: 7 + 6.
Length: 32½ inches.
Beam: 5½ inches.
Inside Span: 24½ inches.
Weight: 30 stone 2 pounds.
No. 219.
LENT BY: The Earl of Kenmare.
SHOT BY: Owner.
LOCALITY: Derricunnihy.
DATE: October 7th, 1895.
NO. OF POINTS: 5 + 5.
LENGTH: 32 inches.
BEAM: 4½ inches.
INSIDE SPAN: 29 inches.
WEIGHT: 23 stone 10 pounds.
REMARKS: This head and the other from the same locality approximate much more closely to the Scottish type of horn than do heads from Glena.
